FOR PRESIDENT

DAVID DUKE

SEND THEM A MESSAGE

I am a populist who is running for President because it is time someone in national politics stood up for the long-ignored, great American Middle-Class: the white and blue collar worker, the small businessman, the farmer and rancher, and the student. For far too long the politicians who control the government have had an ear only for the wishes of the organized minorities, the mass-media, and the international banks and mega-corporations.

It is time they heard our voice. We are of the founding stock that created this nation, that wrote our Declaration of Independence, and the Constitution. We, who have been the driving and creating force of America, are rapidly being relegated to a second-class status.

In a few short years, without enormous changes, we will walk as strangers in our own land. Government is

totally out of hand and none of the current leaders of the Democrats or the Republicans have shown the courage to stand up and even acknowledge the tremendous fundamental changes taking place today.

No other national politician has made the commitment to secure our porous borders, end the barbarism of crime on our streets, the decay of our schools, or even defend the basic rights of the people who are the spirit and sinew of America. We, the great White middle-class, injured and ignored for so long, are awakening.

My candidacy is far more than a run for President. It is an opportunity for the people to finally speak up, for our homes, our children, our heritage, our rights and our future. I am committed to making this campaign for President of the United States a turning point for America.

David Duke

David Duke has been for seven years the President of the National Association for the Advancement of White People, a non-profit, White Civil Rights organization. He has appeared before college audiences and on television programs all over the world, and has been interviewed by commentators such as Barbara Walters and Peter Jennings. He has debated black leaders such as Jesse Jackson. Many consider him an authority on affirmative action, forced busing, immigration, and welfare, and is certainly the most well-known White activist in the world. He is committed to preservation of our heritage, culture and rights, but at the same time respects the rights and heritage of others. He is a dedicated, lifelong anti-communist who instructed officers in Laos during the Viet Nam War. As a child he attended Kindergarten in Holland and ever since has travelled and studied all over the world. His experiences make him determined to prevent America from becoming like a Third World nation. He is determined that his race for president in 1988 will the beginning of the awakening of the great American Majority.

EQUAL RIGHTS FOR ALL – INCLUDING WHITE PEOPLE. Americans can no longer sit back while our rights are taken away through so-called affirmative action. All Americans must be accorded their civil rights, and this must include America's founding White majority. As the first great populist Democrat, Thomas Jefferson, stated, "Equal rights for all, special privilege for none." Excellence must again become the sole criterion for advancement in American society.

FREEDOM OF CHOICE – END FORCED INTEGRATION AND BUSING. Forced integration and busing has led to violence and educational mediocrity for our children. Why must millions of our people pay

high taxes for public education and then suffer financial hardship by having to send their children to private schools so they can be safely and decently educated? And why must decent people, whose income precludes private education for their children, be forced to put their children in integrated schools or even be bused into crime-filled areas where no politician or judge would themselves feel safe to tread?

PRESERVE OUR HERITAGE AND WAY OF LIFE – LIMIT IMMIGRATION. Traditional Americans are determined to preserve the spirit, the heritage and the values of this nation. Americans are not willing to let massive illegal and legal immigration transform America into another Mexico or Haiti.

With each passing day we are becoming a country with a population more like the Third World than like traditional America. Legal and illegal immigration is costing us billions in welfare and social services, greatly increasing the crime problem, robbing Americans of much-needed jobs, and changing great sections of America into carbon copies of foreign lands complete with foreign languages and mores.

In addition to massive immigration, the White middle class supports a welfare system, through taxes, that simply subsidizes a high, illegitimate-minority-birthrate which will completely swamp the founding elements of this nation. We must dramatically limit immigration, and refuse to finance laziness and promiscuity before our nation becomes an overcrowded and alien land, bearing no resemblance to the country of our forefathers.

A REAL CRIME FIGHTING PROGRAM – A RIGHT FOR PEOPLE TO PROTECT THEMSELVES. Americans are sick of the crime that has plagued our country in spite of all the promises of relief by mainline politicians and liberal sociologists. We demand the right to be safe in our homes, on our streets, and for our children to be secure in schools. We demand speedy trials and stiff mandatory sentenances, especially for the violent, brutal criminal. For the law-abiding citizen, ownership of firearms and training in their use should be sponsored and supported by the Government.

Considering the fact that U.S. Government crime figures indicate that Blacks and other minorities commit at least ten times more crime than Whites per capita, the Government should stop forcibly integrating neighborhoods and allow our people to live among people of their own choosing, among whom they feel safe and with whom they are happier. In light of the fact that a great proportion of Black crime is committed by juveniles, it is also legitimate for White people to resist

forced integration in the natural desire for safety of their children.

WELFARE YES – RIP-OFFS NO! The hard-working middle-class Americans are sick and tired of a welfare system that has gone far beyond that of charity and reason. Instead of alleviating poverty, the system has only increased it. There are two fundamental solutions to the welfare quagmire: 1) Workfare instead of Welfare. Under this program, able-bodied welfare recipients would have to perform work for the community in order to receive welfare benefits. And 2) Welfare family planning. The only fundamental way to reduce the poverty rolls is to stop the incredibly high welfare birthrates. Rigorous orientation on birth control methods is needed. It must be made clear to welfare recipients that they will not be rewarded for having illigimate children. We cannot tolerate the situation whereby hard-pressed, middle-class American couples find themselves forced to pay outrageous taxes for the support of the illegitimate, welfare-paid-for babies while being unable to afford children of their own.

PROTECT AMERICAN JOBS AND INDUSTRY. America is dismantling its heavy industry and production. Many of the mega-corporations are closing down America's plants and factories and moving them to The Third World for its cheap labor. Dollars are flowing overseas and are returning to America in the form of foreign purchase of American land and assets. If it continues, Americans shall become tenants in their own country and be totally subject to the whims and desires of the International Financial Community. This process will affect both our living standards and our national sovereignty. We must have fair tarriffs that equalize costs at the water's edge. We also should have a reasonable oil import tariff. We must not be afraid to say that we are protectionists. We seek the protection of American industry and jobs; the safeguarding and keeping of American land and property in the hands of Americans now and in the future.

REAL TAX REFORM. The recent tax reform was no real relief to the American people from the burdensome IRS tax system, (a system that costs billions of dollars for individuals and business to document and comply with). A recent study of Congress shows that even with exempting the poor from taxes, a flat rate of approximately ten percent would bring in the same revenue as presently gained by our graduated system.

PRESERVATION OF THE FAMILY FARM. The American family farm must be defended. Farmers should get

absolute price parity, but this should not be granted to agri-business or absentee owners. Foreign ownership of our farmland must be prohibited. Until we sort out the farm policy mess, current bank loans to farmers must be guaranteed by the government provided that fraud, negligence, or incompetence is absent. All imported agricultural products must be held to the same standards of quality and purity as the FDA puts on American products. Additionally, fair tarriffs should be applied to products that are labor intensive from Third World Countries.

CLEAN UP WALL STREET. In view of the one billion dollar Ivan Boesky stock fraud scandal and many other huge frauds perpetuated against the American people, we support sweeping revision of the Wall Street trading laws and regulations and a vigorous enforcement of current regulations.

A NEW FED – REDUCED NATIONAL DEBT. The privately owned banking monopoly called the Federal Reserve System should be replaced with a national bank committed only to the people of the United States and their welfare.

FREE ENTERPRISE – NOT MONOPOLY CAPITALISM. Free enterprise and competition and private property must be defended uncompromisingly. At the same time, it must be recognized that international capitalism which tends toward monopoly is not free enterprise but really a form of coercion, and that it actually is a form of private socialism that unfairly supresses competition. Businesses must be protected from the huge conglomerates that can artificially affect markets, and at the same time, government regulations that smother small businesses in mountains of red tape must be abolished. The task of government must be to protect the consumer from fraud and American businessmen from a ponderous Federal Government and price-fixing and other machinations of the mega-corporations and national banks.

WAR ON AIDS. An all out war must be declared on the AIDS virus threatening America. For the first time in history, there is acutally a lobby against measures to curb a desease epidemic that will kill millions. The homosexual lobby is actually preventing a frank discussion of the issues of AIDS and appropriate steps to suppress the epidemic. The dangers of Homosexual behavior must be told to the American people—especially the young.

ELECTION OF ALL JUDGES. There should be a Constitutional Amendment that calls for the election of all Judges, including the Supreme Court, just like any other important political office.

THE STRONGEST DEFENSE IN THE WORLD. America should be the strongest power on earth and at the same time maintain a posture of armed neutrality. Implementation of the Star Wars stratagem should move rapidly ahead. NATO should be supported with weapons and technical personell, but it should have Europeans, not American soldiers, to man their own armies. There should be a return of most American troops stationed in Europe and the Far East. Such a policy would save billions in our national budget and affect our balance of payments dramatically.

THE MONROE DOCTRINE ADHERED TO. The policies of the Monroe Doctrine should be followed. Accordingly, there should be a blockade of Nicaragua and the aiding of anti-communist rebels, but it should not be necessary to use American combat troops in that theater.

DON'T STAB OUR FRIENDS IN THE BACK. America should lift all sanctions against South Africa and in fact enter a series of mutually beneficial agreements. Instead of trying to destroy the white people and government of that land, we should aid our kindred peoples in their efforts to protect their own way of life, and should recognize the crucial importance of South Africa's minerals as well as its strategic location.

AMERICA FIRST. In all of our Foreign policy endeavors, we must always put America First. Foreign Aid and military assistance must be based solely on the direct interests of the majority of the American people. We demand that the sovereignty of our government be sacrosanct. We should review our Mid-East Policy and make it more even-handed so that our own economic and strategic interests are served rather than that of the tiny minority that has such excessive influence in the media and in government.
